## Ischia Collection

A beautifully vibrant, intricately hand-painted collection of ceramics forms a captivating backdrop within the restaurant space at Lorenzo's. Laurence Graff sourced each piece during his travels to Ischia, a small island located off the coast of Naples. Renowned as the epicentre of Italy's ceramic legacy, pieces such as this have been crafted by Ischia's artisans for many thousands of years, with the clay used to create each one derived from the island itself – a product of its volcanic origins.
